PROPORTION GRADE
The proportion grades for all diamonds are calculated by the "SSEF cut grade" programm. It combines the table, crown, pavillion and total depth proportions. Proportion grades are distributed into 4 grades.

| :---: | :---: | :---: | :---: |
| 720 | $2 ' 592$ | $5 ' 888$ | 192 |

## TABLE

Table percentages for all diamonds are distributed into 4 grades.
Precision of measurements: $+/-0,005 \mathrm{~mm}$

## TOTAL DEPTH

Total depth percentages for all diamonds are distributed into 4 grades.
Precision of measurement : +/- $0,0075 \mathrm{~mm}$

## CROWN HEIGHT

Crown height percentages for all diamonds are distributed into 3 grades.
Precision of measurement: $+/-0,02 \mathrm{~mm}$ )
